

What's best for patients?

NEW DRUGS

BMJ

New drugs are continually being developed and knowledge about existing drugs is constantly expanding, so it is essential, but difficult, for doctors to keep up to date with the latest developments. *New Drugs* describes the most important therapeutic advances of the past decade and discusses the drugs that will be in common use in the 1990s. Completely revised and updated, this second edition has been expanded to include 11 additional chapters. Its coverage of practical aspects of drug use, avoidance of adverse reactions and interactions, and prescribing at extremes of age makes it an invaluable guide for busy practitioners who want to get the best out of the new drugs currently available.

Chapters include: Adverse reactions to drugs • Calcium antagonists
• Diuretic treatment • Antiarrhythmic drugs • Insulin • Lipid lowering drugs
• Antidepressant drugs • Centrally acting drugs • Controlling symptoms in advanced cancer

Second edition April 1991

UK £14.95; Abroad £18.00 (BMA members £13.95 or £17.00)

CONTROVERSIES IN THERAPEUTICS

Doctors do not always agree on what is the right treatment even for quite common conditions. Often definitive clinical trials have not been performed and no one knows for sure the best way to treat. *Controversies in Therapeutics* looks at some problems that arise in general practice. For each one it offers two different approaches; and Peter Rubin, professor of therapeutics and consultant physician at the University Hospital of Nottingham, provides an editorial comment on these which summarises the prevailing views and helps you to make up your own mind. Written by academic experts with everyday clinical experience, *Controversies in Therapeutics* is a must for all physicians and general practitioners—both those who think they know it all and those who know they don't.

Chapters include: Role of diet in treating atopic eczema • Risks of dependence on benzodiazepine drugs • Thrombolysis and the general practitioner
• Depression in childhood • Theophylline in the management of airflow obstruction • Management of constipation

January 1991

UK £9.95; Abroad £12.00 (BMA members £8.95 or £11.00)
