

UNIVERSITY OF OTAGO
Faculty of Medicine
Wellington Clinical School of Medicine
Wellington, New Zealand

**LECTURER/SENIOR LECTURER IN ENVIRONMENTAL
EPIDEMIOLOGY AND OCCUPATIONAL HEALTH**

Applications are invited for the post of Lecturer/Senior Lecturer in Environmental Epidemiology and Occupational Health in the Wellington Clinical School of Medicine.

The successful candidate should have a medical degree, postgraduate experience in environmental epidemiology, teaching interests at the undergraduate and postgraduate levels, and research interests in this field. He/she will have the opportunity for independent investigation and will also advise and assist others in the design and conduct of studies in the Wellington region and elsewhere in New Zealand. The successful applicant will be expected to serve in a part-time capacity as Medical Officer attached to the Wellington Occupational Health Unit of the Department of Health in order that he/she can engage in specific projects and investigations relating to Occupational health problems in the region, and also undertake such other relevant duties as may be agreed upon.

Salary: Lecturer NZ\$19,437–\$23,446; Senior Lecturer NZ\$26,474–\$34,081 per annum.

Further particulars are available from the Association of Commonwealth Universities (Appts.), 36 Gordon Square, London WC1H 0PF, the Dean, Wellington Clinical School of Medicine, Wellington Hospital, Wellington 2, or from the Registrar of the University, P.O. Box 56, Dunedin, New Zealand.

Applications close on **28 February 1981**.

BONE AND JOINT DISEASES

Arthritis used to be the Cinderella of diseases, but improved diagnostic techniques, advances in joint replacement surgery, and a whole range of non-steroidal drugs have led to a much more active approach to the management of the common bone and joint diseases. Detailed advice on their diagnosis and treatment was given in a series of 16 articles in the *BMJ*, and these have been gathered together in the latest volume based on the popular "Today's Treatment" series.

Demy Octavo—Paperback—131 pages—ISBN 0 7279 0026 9

Price: Inland £3.00; Abroad US \$7.50, including postage

THE FIRST YEAR OF LIFE

Recent research has vastly improved our understanding of a child's development in the first year of life.

In particular, assessment of normal progress is now much more systematic, so that deviations from the normal are recognised earlier.

Dr. Bernard Valman's illustrated account of current methods of examination, assessment and management of the medical problems of early infancy will prove invaluable to all concerned with small babies.

The articles have now been collected into book form in exactly the same format as they appeared in the BMJ.

Price: Inland £5.00;

Overseas US\$12.50

(Inland £4.50;

Overseas US\$11.25 for
