

Correction

Y Xu, P Dadvand, J Barrera-Gómez et al. Differences on the effect of heat waves on mortality by sociodemographic and urban landscape characteristics. *J Epidemiol Community Health* 2013;67:6 519-525.

The first three columns in Table 1 were incorrect in this paper. The numbers in the '10th' column should be moved to the 'Mean' column; the numbers in the 'Mean' column should be moved to the 'Minimum' column; and the numbers in the 'Minimum' column should be moved to the '10th' column. The correct table is below.

J Epidemiol Community Health 2013;67:624. doi:10.1136/jech-2012-201899corr1

Table 1 Descriptive statistics of census tract variables for the Barcelona metropolitan area (Spanish census, 2001)

Percentiles							
Census tract variables	Mean	Minimum	10 th	30 th	70 th	90 th	Maximum
% Residents >64 yr. ¹	21.4	0.9	12.3	16.7	23.6	28.6	51.0
% Low education ²	10.3	0.0	4.0	6.8	13.5	20.4	58.0
% Manual workers ³	44.4	10.0	23.2	36.4	62.0	72.7	89.6
% Unemployment ⁴	12.7	3.7	8.3	10.5	14.5	18.8	55.9
% Houses without AC ⁵	79.6	30.4	70.2	77.0	85.4	90.5	98.5
% Old buildings ⁶	20.2	0.0	0.0	2.3	16.7	53.7	100
% Single dwellings ⁷	17.1	0.0	0.0	5.6	20.8	42.4	98.9
% Perception of little surrounding greenness ⁸	38.3	1.8	14.2	25.6	49.5	66.3	91.7
Percent tree cover ⁹	3.8	1.1	2.1	2.7	3.8	6.3	49.2

¹Percentage of residents aged 65 years or older

²Percentage of residents (16-29 yr.) who are illiterate or have not completed primary school education

³Percentage of manual workers among residents ≥16 yr.

⁴Percentage of unemployed residents ≥16 yr.

⁵Percentage of houses without air conditioning

⁶Percentage of buildings that were built before 1920

⁷Percentage of single dwellings

⁸Percentage of residents perceiving little surrounding greenness

⁹Weighted average of tree cover percentage (MODIS Vegetation Continuous Fields (2002-2003)) in a buffer of 500m around address of residence at time of death.
