Stable for at least 12 months

Two Packs
Issued in boxes of 10 x 1 ml
multi-dose ampoules.
Composite pack of 5 x 1 ml
multi-dose ampoules with
5 x 1 ml ampoules of sterile
distilled water.

The long life of B.C.G. Vaccine Glaxo enables standardisation and safety tests to be completed on every batch before it is issued. When you receive the vaccine you can rely upon its potency for a full year—which gives great flexibility in arranging immunisation programmes. Made in this country by Glaxo, the vaccine is easy to obtain (available on Ministry contract) and simply prepared for intradermal use with Water for Injection. Freeze-dried B.C.G. Vaccine Glaxo produces a satisfactory Mantoux-conversion without undesirable reaction.

INDUSTRIAL CLEANLINESS

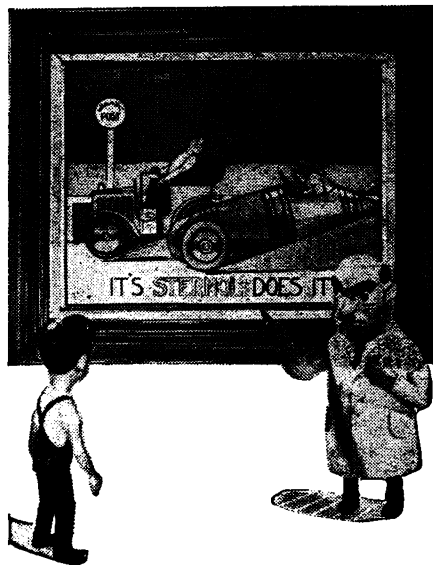

SAROUL

gives 24 hour protection to hands and skin

Adequate protection is ensured by using Saroul after work—it is scientifically compounded to remove grime and dirt quickly and completely. It is not a harsh antiseptic but a cleansing agent which assists the natural healing processes and extends its protective effect for many hours. Saroul is a positive safeguard against industrial dermatitis.

Testing samples and literature free on request to Dept. CS.

"MORE CORN FROM
 FINSBURY SQUARE?"

"Now, now . . . a little more respect from you, my lad—that was one of the old masters of our early advertising (Hassell circa 1912). And what's more, we're still first past the post with our products . . . Sternocleanse Barrier Cream always wins hands down!"

overcoming one cause of absenteeism

Sufferers from spasmodic dysmenorrhoea very often "acquire the habit of staying away from work . . . for the first day or two of menstruation."¹ This habit, regarded as routine by many girls, can be largely overcome by a regular monthly prescription of Buscopan, the most advanced and effective medical treatment yet formulated for spasmodic dysmenorrhoea. Buscopan, unlike an analgesic, is a specific therapy and *not* symptomatic treatment. Its action is on the parasympathetic innervation of the uterus, where it relieves the condition smoothly, promptly and without side-effects. Buscopan does not give rise to gastric upsets, has no effect on the higher centres and is excellently tolerated.

¹(1957), *Practitioner*, 178, 320.

PRICE REDUCTION

From November 1st the N.H.S. price of Buscopan tablets will be reduced by approximately 10% on all packs.

BLANKET WASHING *in Hospitals*

Infection from bedclothes has always been an item of concern in Hospitals. Until recently the most satisfactory method was to wash the blankets in a suitable detergent, rinse and then treat with a cation-active germicide. The action of cleaning and disinfection can now be carried out *simultaneously* by using the new detergent/sterilizer Hytox, which is effective against a wide range of Gram positive and Gram negative organisms.

HYTOX

**THE COMBINED
DETERGENT/STERILIZER**

**Extract from
letter to
'THE LANCET' 11.10.58**

... Hytox has now been tried at one of our Hospitals with great success. The blankets emerge very white, soft and clean and the fibres have anti-bacterial properties and are sterile. Hytox is also inactivated by traces of ordinary washing soap in the blanket or in the crevices of the washing machine; so the first time a used blanket is washed the results may be disappointing. However, the second time the blankets are washed in a clean machine the results are very satisfactory.
