Increased life expectancy has created many new opportunities for a fuller life but has also brought about new problems. Many of your elderly patients may be suffering from loss of weight, poor appetite, "spongy" bones, poor resistance to infection, and a feeling of apathy. These difficulties may be overcome by the administration of ORABOLIN—the oral anabolic agent.

Pharmacological and clinical studies have shown that

# ORABOLIN

- Stimulates appetite
- Promotes weight gain
- Increases calcium and nitrogen retention
- Produces significant psychological improvement

## FORM and PACK
