

Applications are invited for

Chairperson of the Department of Epidemiology

The University of North Carolina School of Public Health seeks a qualified epidemiologist to head a large and varied Department of Epidemiology. The position includes administrative, teaching and research responsibilities. The department has established graduate training programs in Environmental Epidemiology, Social Epidemiology, Population Epidemiology, Health Services Research, and Alcohol and Drug Abuse. Demonstrated achievement in teaching and research is expected.

The University of North Carolina is an Equal Opportunity Affirmative Action Employer and encourages application from minority group members and women.

Part 2

June 1975

CONTENTS

- Banding Identification of Chromosomal Abnormalities in Four Patients: Ring (6), Translocation (2q-; 15q+), Translocation (21q; 21q) and Deletion (22q-)** DORIS H. WURSTER-HILL and D. HOEFNAGEL
- The use of a Registry Caseload Survey in Predicting Trends in Rehabilitative Needs for the Handicapped.**
J. R. MILLER and R. P. GALLAGHER
- Some Aspects of Carbohydrate Metabolism in Prader-Willi Syndrome.** CHANDRA SAREEN, R. H. A. RUVALCABA and V. C. KELLEY.
- The Nature of the Colour Retention Deficit in Down's Syndrome,** JANICE SINSON and N. E. WETHERICK.
- The Long Arm Deletion of Chromosome No. 6 in a Mentally Retarded Boy with Multiple Physical Malformations.**
JOVANKA MILOSEVIC and P. KALICANIN.
- Topological Formulation of Finger-Tip Patterns: An Attempt of its Application in Comparisons of Complete and Incomplete 21 Trisomics with Normality.** DANUTA LOESCH.
- Intra-Subject Controlled Timeout (Social Isolation) in the Modification of Self-Injurious Behaviour.** P. C. DUKER.
- Review of Aversion Therapy for Self Mutilating Behaviour.** J. H. CORBETT.

How to start an epidemic.

FLU immunisation is quick and painless

This poster (in colour) is one of the powerful designs available free together with explanatory leaflets and consent forms, to help your immunisation programme.

30 million working days lost in one year.

Incredible as it may sound, flu caused the loss of roughly 30 million working days in 1969/70 – more than three times the working time lost through industrial action. Admittedly, that was regarded as an ‘epidemic’ year – but there were still over one million influenza benefit claims made in the previous year, which was regarded as normal.

The conclusion is obvious. Flu is more than just a seasonal nuisance – to the employer it can mean a fall in productivity, damaging at best, crippling in the event of a full-scale epidemic.

Immunisation with Admune provides the answer.

ADMUNE

The purely British flu vaccine

Admune is a Trade Mark of
DUNCAN, FLOCKHART & CO. LTD. LONDON E2 6LA
