Care of the Elderly

Meeting the Challenge of Dependency

Proceedings of a Conference sponsored jointly by the Institute of Medicine, National Academy of Medicine, Washington DC, the Royal Society of Medicine and the Royal Society of Medicine Foundation Inc.

edited by A. N. Exton-Smith and J. Grimley Evans

July 1977, xii + 306 pp., £11·80/\$23·00

0.12.244950.9 (Academic Press) 0.8089.1055.8 (Grune and Stratton)

This book compares the operation of health and social services in the United Kingdom and the United States from a variety of different viewpoints. The topics discussed include the physical and psychological changes associated with the aging process and their relationships to clinical manifestations, the effects of mental deterioration resulting from dementia and the demographic characteristics of the aging population in the United Kingdom and the United States.

TODAY'S TREATMENT / 2

The first volume of *Today's Treatment* has proved a best-seller. Doctors clearly welcome its down-to-earth advice on the selection of effective remedies for common disorders. The second volume, just published, covers endocrine and metabolic diseases, cardiovascular disorders, and the alimentary system. Again the chapters are based on articles first published in the *BMJ*; and the advice provides busy practitioners with a reliable working manual.

Still available — Today's Treatment/1

This first volume contains articles published in the *BMJ* in 1974-75 on disorders of the skin and blood, and on psychiatric and neurological diseases. These simple clear accounts of assessment and management provide all the information needed for a rational choice of the best treatment for each individual patient. *Demy octavo. Paperback. 385 pages* ISBN 0 7279 0010 2

Price: Inland £4.00; Abroad US \$10.00, including postage.

PROBLEMS OF CHILDHOOD

From the British Medical Journal

While in paediatrics the spotlight has, perhaps, swung recently on to behavioural and psychological aspects of child development, much of the clinician's time is still spent with acute and chronic physical disorders. Both these aspects of medical problems in childhood were reviewed in a series of *BMJ* articles published early in 1976, and these have now been collected together after further revision by their authors. We hope the collection will prove useful to doctors at all stages of their careers: for children occupy a great deal of the time of every general practitioner, and confidence in their care demands both experience and knowledge.
