

Remembering Henry

Edited by Stephen Lock and Heather Windle

*A man of stature—in all ways—Henry Miller occupied a large part in many people's lives and his death in 1976 left a large gap. Though a neurologist of world renown he was best known in the North-East, where he spent most of his life, and where, for the last eight years of it, he was Vice-Chancellor of the University of Newcastle upon Tyne. A cross-section of his many friends and colleagues have contributed their reminiscences to **Remembering Henry** and, as each person saw him from a different angle, those who did not know him will find that the whole man gradually comes to life. Professor John Walton has written the introduction, three of Henry Miller's best-known articles are included (writing was his first interest after neurology), and there is a bibliography of his prolific publications. A fitting tribute, **Remembering Henry** may fill some of the gaps for those who have stayed behind. Profits from the book will be given to the Henry Miller Memorial Appeal.*

FEMS Symposium No. 2

GONORRHOEA

Epidemiology and Pathogenesis

edited by F. A. Skinner, P. D. Walker and H. Smith

November/December 1977, xviii + 256 pp., £11.00/\$21.80 0.12.648055.9

Certain diseases once thought to be under control with the development of antibiotic drugs can re-emerge in pandemic proportions as an unpredicted result of changed conditions. Gonorrhoea is one such, and the recent alarming rise in its incidence has prompted much new research into diagnosis, pathogenesis, immunology, epidemiology, prevention and treatment. Factors such as increased social mobility, and the occurrence of penicillinase-producing strains with the drug resistance carried on transmissible plasmids, have added a new dimension to the situation. Also, new methods for reporting new cases, and different techniques of diagnosis, alter the number of cases known to venereologists.

This volume records a Symposium organized by The Society for Applied Bacteriology and The Society for General Microbiology on behalf of the Federation of European Microbiological Societies in November 1976 to discuss the problem of gonorrhoea. Among the topics of current research covered are method of attachment of gonococci to mucous surfaces, phagocytosis, and immunology. There is also a review of the epidemiology and antibiotic resistance of gonococci.

BRITISH JOURNAL OF PREVENTIVE & SOCIAL MEDICINE

on MICROFICHE

Since January 1976 the British Journal of Preventive and Social Medicine, has been published in a microfiche edition simultaneously with the standard paper edition. Overseas subscribers to the microfiche edition will receive microfiches, by AIR MAIL, within days of publication. The availability of the microfiche edition should have great appeal to libraries and other readers far distant from the United Kingdom.

The microfiches produced for the British Medical Association conform to the international standard as laid down by the National Microfilm Association of America. These microfiches are produced by a step and repeat camera with duplicates produced on silver halide film for archival permanence. Each fiche measures 105 mm x 148 mm and can contain up to 98 images filmed at a reduction ratio of 24 x along with an eye readable title for identification. Details of microfiche volume binders are available on request.

The subscription prices for each annual volume on microfiche are as follows:

	Inland	Abroad
For subscriber to the paper edition	£6.50	US \$13.00
For those who do not subscribe to the paper edition	£9.75	US \$19.50

Volume 29, 1975 and Volume 30, 1976, are also available on microfiche at these rates.

Orders for the microfiche edition of this journal can be sent to:

The Publisher, British Journal of Preventive and Social Medicine, B.M.A. House, London WC1H 9JR. Readers in U.S.A. can order from: BRITISH MEDICAL JOURNAL, 1172 Commonwealth Avenue, Boston, Mass. 02134, or through any leading subscription agent.
