

Official journal of the  
International Epidemiological  
Association

# International Journal of Epidemiology

Editor: Peter O D Pharoah, Department of Public Health, University of Liverpool, Liverpool, UK.

The **International Journal of Epidemiology** continues to be the leading journal in its field, and is essential reading for anyone who needs to keep up-to-date with the very latest developments throughout the world.

The journal has for many years encouraged communication among those engaged in the research, teaching and application of epidemiology of both communicable and non-communicable disease. Research into health services and medical care is also covered, as are new methods for the analysis of data used by those who practice social and preventative medicine.

#### RECENT PAPERS INCLUDE:

*Volume 23, number 1*

Space-Time Clustering in Insulin-Dependent Diabetes Mellitus (IDDM) in South-East Sweden. **Ulf Samuelsson, Calle Johansson, John Carstensen and Johnny Ludvigsson.**

DNA Probes as Epidemiological Tools for Surveillance of *Plasmodium falciparum* Malaria in Thailand. **Robert H Barker Jr, Trairat Banchongaksorn, Jeanne M Courval, Wannapa Suwonkerd, Kamolwan Rimwungtragoon, Nitaya Srititong and Dyann F Wirth.**

*Volume 23, number 2*

Verbal Autopsies for Adult Deaths: Issues in their Development and Validation. **Daniel Chandramohan, Gillian H Maude, Laura C Rodrigues and Richard J Hayes.**

Childhood and Adolescent Passive Smoking and the Risk of Female Lung Cancer. **Fu-Lin Wang, Edgar John Love, Ning Liu and Xu-Dong Dai.**

Why Infant Very Low Birthweight Rates have Failed to Decline in the United States Vital Statistics. **Samuel Sepkowitz.**

Prevalence and Causes of Visual Impairment in Italy. **Alfredo Nicolosi, Paolo E Marighi, Paola Rizzarda, Alberto Osella and Stefano Miglior.**

A Mathematical Model for the Prediction of the Impact of HIV Infection on Tuberculosis. **Michael Schulzer, M P Radhamani, Stefan Grzybowski, Edwin Mak and J Mark Fitzgerald.**

*Volume 23, number 3*

Differential Effects of Tar Content, Type of Tobacco and Use of a Filter on Lung Cancer Risk in Male Cigarette Smokers. **Simone Benhamou, Ellen Benhamou, Ariane Auquier and Robert Flamant.**

Diarrhoea - Defining the Episode. **Saul S Morris, Simon N Cousens, Claudio F Lanata and Betty R Kirkwood.**

Sex Differences in Measles Mortality: A World Review. **Michel Garenne.**

*Volume 23, number 4*

Forced Movements of Population and Health Hazards in Tropical Africa. **R Mansell Prothero.**

Myocardial Infarction Case-Fatality Gradient in Three French Regions: The Influence of Acute Coronary Care. **Phillipe Amouyel, Dominique Arveiler, Jean-Pierre Cambou, Michèle Montaye, Jean-Benard Ruidavets, Annie Bingham, Paul Schaffer and Jacques-Lucien Richard.**

Determinants of Stunting and Recovery from Stunting in Northwest Uganda. **Venanzio Vella, Andrew Tomkins, Amando Borghesi, Giovanni Battista Migliori and Vincent Yooman Oryem.**

*Volume 23, number 5*

Stratospheric Ozone and Health. **Bruce K Armstrong.**

Short-Term Effects of Air Pollution on Daily Mortality in Athens: A Time-Series Analysis. **G Touloumi, S J Pocock, K Katsouyanni and D Trichopoulos.**

#### FORTHCOMING PAPERS INCLUDE:

Modelling AIDS Reduction Strategies. **D A Kaul.**

Differential Response to Early Nutrition Supplementation: Long-Term Effects on Height at Adolescence. **M T Ruel, J Rivera, J-P Habicht and R Martorell.**

Mortality Following Radiation Treatment for Infertility of Hormonal Origin or Amenorrhoea. **E Ron, J D Boice Jr, S Hamburger and M Stovall.**

Changing Patterns in the Epidemiology and Hospital Care of Peptic Ulcer. **P Primatesta, M J Goldacre and V Seagroatt.**

Determinants of Excellent Health: Different from the Determinants of Ill-Health? **J P Mackenbach, J van den Bos, I M A Joung, H van de Mheen and K Stronks.**

# Journal of PUBLIC HEALTH MEDICINE

Keep in touch with  
current theory and  
practice within the  
whole spectrum of  
public health  
medicine.

## Editors:

Professor R J Madeley  
*University of  
Nottingham, UK.*

Dr P C Milner  
*Dept. Public Health,  
Rotherham Health  
Authority, Rotherham,  
UK.*

.....It seems as if the paradigm for public health has become enmeshed in academic epidemiology, and concerns how much deviation from the standard of various epidemiological methods can be permitted in polite company.....

*Professor R Madeley  
Editorial Volume 15 Number 3*

.....The debate on the teaching of Public Health Medicine usually concentrates on who should teach whom, what, where, and how. It should not be forgotten that the purpose of an education programme is also to inspire.....

*Dr P Littlejohns  
Editorial Volume 15 Number 1*

The Journal of Public Health Medicine looks in depth at the causes of disease and, in the light of this, how to prevent ill health and promote good health. Disease trends are also monitored, as are outbreaks and environmental hazards. The journal also covers planning, provision and evaluation of health services.

*Now you can find the information  
you really need...*

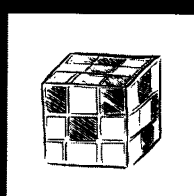

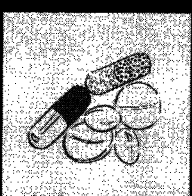

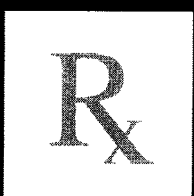

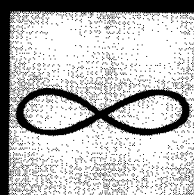

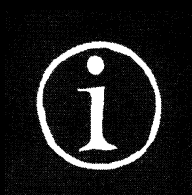

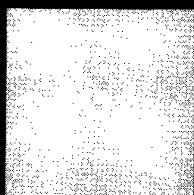

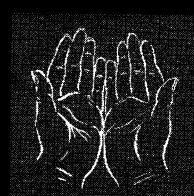

# Evidence-Based Medicine

*Editors: B Haynes & D Sackett*

With 2 million new papers published each year how can you be sure you read all the papers essential for your daily practice, and how can you be sure of the scientific soundness of what you do read? One answer to this dilemma is practising evidence based medicine, basing clinical decisions on the best available scientific evidence.

To meet this need the BMJ Publishing Group together with the American College of Physicians is launching a new journal - *Evidence - Based Medicine*. This new journal is a development of the ACP Journal Club.

Published bi-monthly *Evidence - Based Medicine*, will survey a wide range of international medical journals (at least 50) to identify the key research papers that are scientifically valid and relevant to practice.

**Launching in September 1995,  
*Evidence-Based Medicine* will:**

- use scientific criteria to select the abstracts from the most important papers from the world's leading journals
- select only those papers which have a direct message for practice
- provide commentaries on the abstracts which will make clear the importance of the papers
- supply educational material to teach you about evidence based medicine
- cover all medical advances that are really important
- cover internal medicine, and the major specialties, including general surgery, paediatrics, obstetrics & gynaecology, psychiatry, general practice, anaesthesiology and ophthalmology.
